TECHNICAL SKILLS

Ruby, Ruby on Rails, SQL, JavaScript, React, HTML5, CSS3

TECHNICAL PROJECTS

Finance Tracker - [Github](#) | [Demo](#)

A personal finance tracker to design a budget and track daily income and expenses.

- Utilized BCrypt gem and ActiveRecord to handle encrypting of user information.
- Constructed Ruby on Rails backend utilizing the Model View Controller pattern.
- Designed and built React frontend, utilizing React Router for client-side routing.
- Utilized React-Google-Charts chart library to handle the display of Pie and Area Charts.

The Game Corner - [Github](#) | [Demo](#)

A video game catalog to browse game information and reviews.

- Utilized Ruby, ActiveRecord, Sinatra, and Faker gem to create a backend with the MVC pattern.
- Constructed React frontend, utilizing React Router for client-side routing.
- Created an in-depth review section utilizing React-Stars, including username, date, rating, and the review body.
- Created, rendered, and edited a 3D animation utilizing Blender.

Word Muncher - [Github](#) | [Demo](#)

A reimagination of the classic snake game with an original twist.

- Utilized external Words API to generate associated words from user input.
- Configured behind the scene logic of the game mechanics.
- Constructed JavaScript frontend utilizing the Document Oriented Model.
- Utilized multiple stylesheets to design different frontend themes.
