SOFTWARE ENGINEER

Full stack software engineer trained in JavaScript, React, Ruby, Ruby on Rails, HTML5 and CSS3. Lifelong passion and fascination for building web applications to create solutions and develop new technologies. Thrive working on teams where time management, innovation, and analytical thinking contribute to successful solutions.

TECHNICAL SKILLS

Ruby, Ruby on Rails, SQL, JavScript, React, HTML5, CSS3, POS Systems

TECHNICAL PROJECTS

Finance Tracker - Github | Website | Demo
A personal finance tracker that allows users to create a budget, track daily income and expenses.
- Applied BCrypt and Active Record to ensure security of user information.
- Constructed Ruby on Rails backend utilizing the Model View Controller pattern in order to store user data.
- Designed and constructed React frontend to provide a smooth and intuitive user experience.
- Utilized React-Google-Charts to display budget, cash flow, and net worth information for the user.

The Game Corner - Github | Demo
A video game catalog where users can browse different game information and leave reviews.
- Modeled, rendered, and edited a 3D animation using Blender for the home page background.
- Developed Ruby, ActiveRecord, and Sinatra backend to store game and review information.
- Constructed React frontend that includes the home, game list, game instance tab, and user tab.
- Utilized React-Stars to create an in-depth and interactive review section.

Word Muncher - Github | Website | Demo
A reimagination of the classic Snake game where users collect letters to spell words.
- Developed json-server database in order to let users choose between built-in word lists.
- Incorporated Words API which users can interact with to develop a personalized word list.
- Configured behind the scene logic of the game mechanics.
- Constructed JavaScript frontend utilizing the Document Oriented Model.
